Try **Online Engine** before you buy

Online Test Engine: Online Tool, Convenient, easy to study. Instant Online Access. Supports All Web Browsers.

PDF format: Easy to read and print learning materials, our products are available in PDF file format.

Desktop Test Engine: Installable Software Application. Simulates Real Exam Environment. Practice Offline Anytime.

What Client's Say

"I passed today with score 80%. I confirm that it's valid in UK. Focus on "Correct answer" and forget the "Answer X from real test". I had free new questions.

Sebastian
★★★★★

"Questions from this HPE0-S51 dump are 100% valid... not all answers. I passed this exam a few days ago (in France) and got these results.

Wayne
★★★★★

Latest Study Materials, Valid Dumps - ExamsLabs

NO.1 Identify the correct error description and solution for the following error message from the ESB profile: => ERROR - RelayUtils error while building Passthrough stream
org.apache.axiom.soap.SOAPProcessingException: Transport level information does notmatch with SOAP Message namespace URI.

- A.** Options a, b and c all provide mismatching reasons/solutions, so all of the answers are incorrect.
- B.** This happens when a soap11 message is sent to a soap12 endpoint or vice versa, resulting in the p, message content type not matching the SOAP namespace URI, e.g., soap11 should have text/xml content type and soap12 should have application/soap+xml content type. Solution: Enable the relevant message builder/formatter in axis2.xml for the matching content type.
- C.** The ESB profile has failed to extract the transport protocol from the given URL. This happens when theO transport defined in the URL is not enabled in the system. Solution: Enable relevant transport sender in axis2.xml.
- D.** This happens when a soap11 message is sent to a soap12 endpoint or vice versa. Solution: Correct the SOAP envelope namespace.

Answer: D

NO.2 Which scripting language is not supported by the Script mediator?

- A.** Ruby
- B.** Groovy
- C.** XSLT
- D.** JavaScript

Answer: C

NO.3 Select the appropriate Enterprise Integration Pattern (EIP) that can be used to combine the results of individual but related messages so that they can be processes as a whole.

- A.** Envelope Wrapper
- B.** Process Manager
- C.** Composed Msg. Processor
- D.** Aggregator

Answer: B

NO.4 Which statement is true about message transformations in the ESB profile?

- A.** Header mediator can only work with SOAP headers.
- B.** Data Mapper mediator can perform JSON-to-JSON transformation without converting the message to a canonical form.
- C.** Enrich mediator cannot be used for message transformation.
- D.** All the transformation mediators require SOAP as the canonical message format.

Answer: B

NO.5 Which statement about the Entitlement mediator is true?

- A.** Entitlement mediator intercepts requests and evaluates the actions performed by the user against an extensible Access Control MarkupLanguage (XACML) policy.
- B.** Entitlement mediator can only work with WS02 Identity Server as the PolicyDecision Point.

C. When configuring the mediator, you specify which sequence to execute depending on the Entitlement mediator result.

D. All of the above.

Answer: A

NO.6 Which of the following is FALSE about SOAP?

A. SOAP allows for any programmable model.

B. SOAP is extensible with encryption and signing.

C. SOAP can be used over HTTPOnly.

D. SOAP is built using XML.

Answer: C

NO.7 Which statement is FALSE about SSL profile support in WS02 EI?

A. The purpose of SSL profiles is to allow connections to different servers with different certificates and identities.

B. SSL outbound profiles allow different SSL profiles for different backend servers.

C. Each ssl profile uses the same keystore and truststore.

D. Inbound SSL profiles allow you to specify different SSL profiles for different IPs of clients

Answer: C

NO.8 Which statement about large file transfer using ESB profile is true?

A. You can enable streaming within your ESB pfoeile configuration using a parameter.

B. To enable binary file transfer, you must enable the message builder and formatter for the relevant content type in axis2.xml.

C. Files can be transferred as binary files using streaming to reduce processing and memory requirements.

D. All of the above.

Answer: C
