Try **Online Engine** before you buy

Online Test Engine: Online Tool, Convenient, easy to study. Instant Online Access. Supports All Web Browsers.

PDF format: Easy to read and print learning materials, our products are available in PDF file format.

Desktop Test Engine: Installable Software Application. Simulates Real Exam Environment. Practice Offline Anytime.

What Client's Say

"I passed today with score 80%. I confirm that it's valid in UK. Focus on "Correct answer" and forget the "Answer X from real test". I had free new questions.

Sebastian
★★★★★

"Questions from this HPE0-S51 dump are 100% valid... not all answers. I passed this exam a few days ago (in France) and got these results.

Wayne

- A.E-Mail Router
 - B.Deployment Manager
 - C.Outlook Rich Client
 - D.Workflow Monitor
- Correct:A

NO.3 Microsoft CRM Version 1.2 can be installed in both Windows Server 2000 and Windows Server 2003 environments. In either of these environments, how many Primary Domain Controllers are installed in a single domain?

- A.One Primary Domain Controller is always required
- B.At least one Primary Domain Controller and as many Backup Domain Controllers as needed
- C.None. All Domain Controllers are considered peers in both Windows Server 2000 and Windows Server 2003 environments
- D.None. Domain Controllers are not required in a Windows Server 2000 or Windows Server 2003 environment running Microsoft CRM

Correct:C

NO.4 Which technology does the Microsoft CRM browser client use to serve the user interface to Internet Explorer?

- A.XML

B.Generated Platform API

C.ASP.NET

D.Fetch Builder

Correct:C

NO.5 Which component of the Microsoft CRM architecture abstracts the underlying data storage

details, such as schema and data access, from the higher-level constructs of domain logic implementation and user interface?

A.Data access layer

B.MDAC

C.Metadata

D.Database layer

Correct:C

NO.6 The integration between Microsoft CRM and Microsoft Outlook uses which technology that

allows users of the Sales for Outlook Client to see their contacts, leads, activities, opportunities,

tasks, appointments, and e-mail?

A.MDAC 2.7a

B.Microsoft Message Queuing

C.XML Web Services

D.UDDI

Correct:C

NO.7 When the Sales for Outlook Client is running in offline mode, the Platform layer makes one

additional database write for all successful data modifications against the local MSDE data store.

What is this second store called?

A.The client's local Metabase

B.The client's local Business Data

C.The client's local distribution database

D.The playback graph

Correct:D

- A.Application
- B.Platform
- C.Database
- D.Presentation

Correct:B

NO.10 Which of the following databases are automatically created in the SQL Server environment

during installation of Microsoft CRM Server?

- A.CRM Metabase
- B.CRM database
- C.CRM Crystal database
- D.CRM Distribution database

Correct:A B C D

NO.11 Which advantage does the Active Directory domain architecture provide for companies that

have deployed Microsoft CRM Version 1.2 in a Windows Server 2003 domain?

A.It provides a single point of management for user accounts, computers, and applications in the

Windows Server 2003 domain

B.It meets the messaging and collaboration needs of small organizations, large distributed enterprises,

and everything in between.

C.It enables structured data exchange and data transport

D.It enables an unprecedented level of software integration through the use of XML Web Services.

Correct:A

NO.12 What is the purpose of the Sales for Outlook Client's playback graph?

- A.It is used for database recovery purposes in the event the client's local MSDE database crashes and has to be reloaded.
- B.When an offline Outlook Client synchronizes with the CRM server, the playback graph drives the synchronization process by providing the server with each update operation that occurred when the client was offline
- C.It provides a date and time stamp of each update operation that occurred on the client, which is used to determine whether the server or client transaction should "win" in the event of a conflict during synchronization
- D.When an online client goes offline, the playback graph is used to construct the offline data set that is copied to the client's local database
- Correct:B

NO.13 Microsoft CRM is tightly integrated with which of the following technologies for the purpose of validating access level security upon each user request?

- A.SQL Server 2000
 - B.Active Directory
 - C.Internet Information Server (IIS)
 - D.Exchange Server 2000
- Correct:B

NO.14 Which technology allows Microsoft CRM to share data and invoke capabilities from other applications without regard to how those applications were built, what operating system or platform they run on, and what devices are used to access them?

- A.Application Programming Interfaces
 - B.XML Web Services
 - C.UDDI
 - D.Microsoft Exchange
- Correct:B

NO.15 Which layer of the Microsoft CRM architecture is responsible for performing the

majority of the
business logic?

- A. User Interface
- B. Application
- C. Platform
- D. Data Access

Correct: C

- A. Windows NT 4.0
- B. Microsoft .NET
- C. Web Net
- D. SQL Server 2000

Correct: B

NO.17 What does the platform layer use to protect itself from changes to the underlying database?

- A. Kernel
- B. Metadata
- C. Platform Support Library
- D. SQL Interpreter

Correct: B

NO.18 XML Web Services are invoked over the Internet by means of industry-standard protocols including which of the following?

- A. SOAP
- B. ASP.NET
- C. Microsoft.NET
- D. UDDI

Correct: A

NO.19 When an online Outlook Client goes offline, what process does Microsoft CRM use to create the offline data set for the client?

- A. Active Directory Replication

- B. SQL Replication
 - C. DB Replication
 - D. MSDE Replication
- Correct: B

NO.20 Which of the following are TRUE statements regarding the architecture of the Sales for Outlook

client in Microsoft CRM Version 1.2?

A. When online, the Outlook client processes all application logic locally, although the primary business logic is processed on the CRM server

B. When an online client goes offline, Microsoft CRM uses SQL Replication to construct an offline data set

that is copied to the client local database that is copied to the client? local database

C. When the client synchronizes with the server database, any updated forms on the server are converted

from DHTML pages to ASP.NET pages when stored on the client

D. The Outlook client stores its local data in a Microsoft Access database

Correct: A B
